

Top Tips

PHOTOGRAPHY 101

A cloudy/overcast sky offers the best natural light

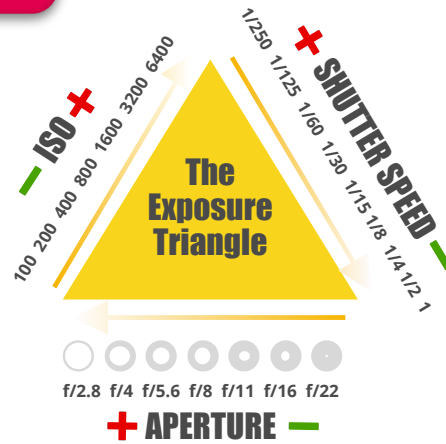

1

Lighting

Plan Your Lighting

Follow the **EXPOSURE TRIANGLE** for proper exposure. If you change one of these, the other 2 must change to maintain proper exposure.

2

Use Auto Focus

Photos should be sharp and not blurry.

LIGHT should be on your subject's face, not behind them

Use **PLAIN BACKGROUNDS** whenever possible

DON'T USE in-camera EFFECTS/FILTERS

Plan the composition

4

Use the **RULE OF THIRDS**: visually divide image into thirds and place your subject in the middle at the intersection of those dividing lines, or along one of the lines itself.

Stabilize Your Device

Remember To...
